CAREER OBJECTIVE

Detail-oriented Frontend Developer with foundational experience in React and TypeScript, component-based architecture, state management, and responsive design. Passionate about design systems, developer experience, and UI consistency — with a genuine appreciation for the internal tooling and documentation that makes engineering teams faster and more effective. Self-directed, collaborative, and comfortable taking ownership of tasks from start to finish. Eager to contribute to a real codebase, write meaningful tests, and grow under the mentorship of experienced frontend engineers.

SKILLS

Frontend & Frameworks: React.js, Next.js (App & Pages Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, DaisyUI, Framer Motion, Responsive Design, Component-Based Architecture

Design Systems & UI: Component library development, reusable component APIs, design-to-code implementation, Figma-to-UI workflows, UI consistency, visual accuracy, design system thinking

Build Tooling & Workflow: Git, GitHub, Vercel, basic CI/CD awareness, Vite/Webpack (familiar), ESLint, remote async collaboration

Backend & APIs: Node.js, Express.js, MongoDB, REST API integration, JWT, Firebase, BetterAuth, Stripe

AI Tooling: Claude AI, ChatGPT, GitHub Copilot — used daily to write, debug, review, and ship faster

PROJECTS

Next.js platform with **role-based dashboards** (Donor, Volunteer, Admin) and donation request lifecycle management

BLOOD LINK — Blood Donation Platform | [Live](#) | [Client](#) | [Server](#)

- Built complex role-based UI with multi-state dashboards, async data fetching, and live analytics — showcasing advanced JavaScript state and event handling
- Integrated Stripe with server-side payment intents; Firebase Auth with JWT middleware — demonstrating real-world API consumption and async flow management
- Maintained readable, well-structured component code with consistent patterns across the full application

Stack: Next.js, React, Node.js, Express.js, MongoDB, Firebase Auth, JWT, Stripe, Tailwind CSS, Framer Motion

STUDYNOOK — Study Room Booking System | [Live](#) | [Client](#) | [Server](#)

- Wrote clean, well-documented JavaScript/React code with clear state flow, event handling patterns, and modular component architecture
- Implemented real-time conflict detection using async API calls and MongoDB query operators — demonstrating strong understanding of async/await and DOM-driven UI updates
- Applied ES6+ patterns throughout: destructuring, optional chaining, async/await, and modular imports
- Secured with JWT in HTTP-only cookies; methodical approach to auth flow logic and data integrity

Stack: React, Node.js, Express.js, MongoDB, Mongoose, JWT, Tailwind CSS, Framer Motion

SKILLSPHERE — Online Learning Platform | [Live](#) | [Client](#)

- Developed with Next.js App Router; real-time course search, protected dynamic routes, and personalized dashboard — all built on clean ES6+ JavaScript patterns
- Documented component logic and state flow clearly across the codebase; consistent, reviewable code structure throughout

Stack: Next.js (App Router), Tailwind CSS, DaisyUI, BetterAuth, MongoDB, Framer Motion

EDUCATION

Bachelor of Science (B.Sc.) in Fisheries | Patuakhali Science and Technology University | **2024 – Present (Level 2, Sem 2)**

LANGUAGE PROFICIENCY

Bengali: Native

English: Intermediate — proficient in technical documentation, written communication, and professional correspondence
